President’s Letter

Dear Friends,

The fall season is definitely here, and there is no greater evidence of that fact than the magnificent foliage lining our streets throughout New York City. What fascinates me most about this transformation process is the knowledge that those very leaves—as fragile as they are—when tested, begin to display an awe-inspiring beauty. It is that same beauty that I see in the children and families who reside here at Ronald McDonald House New York.

In this issue of Around the House, our focus is education. Being a home-away-from-home to more than 80 families at a given time represents a unique opportunity to provide more than just bricks-and-mortar shelter. I can remember from my childhood in Boston that each new day brought tremendous possibilities and discoveries. I’m a firm believer that a diagnosis of cancer should not mean that a child’s learning should be put on hold.

For many of the young minds under our care, there is very little concern about the challenging streets of Manhattan, or as much as a desire to live, explore and just be a regular child. In fact, for more than 30 years, we’ve been devoted to making our children feel like kids first, as opposed to kids with cancer. Our relationship with the Department of Education enables children battling pediatric cancer and their siblings to have a chance beating the odds and staying on track with their studies.

We’ve told a number of stories in this issue; far too many to count off in my introduction. I hope that you’ll continue to share with us in the creation of new stories filled with hope, courage and love. As we celebrate the bright splashes of color in our lives and how they’ve helped us to overcome adversity; I hope that you will remember the families at Ronald McDonald House New York. Should you feel moved to spend time with us over the holidays, visit us on East 73rd Street or online at www.rmh-newyork.org.

Sincerely,

William T. Sullivan
President & Chief Executive Officer

What’s New at Your House?

Jon Lawrence Shevell “Legacy of Kindness” Seventh Floor Terrace

Trying to describe the seventh floor terrace at Ronald McDonald House New York may be a little tough to do at first for the mere fact that its beauty will leave you speechless. A part of the legacy gift generously provided by the family of Jon Lawrence Shevell, this new terrace offers a veritable garden hide-away for families battling cancer.

Throughout the summer, the terrace’s greenhouse flourished with produce grown by residents, staff and volunteers of the House. Its bounty of blueberries, tomatoes, peppers and fresh herbs served as a tremendous highlight throughout the season. What’s New at Your House?

Monarchs, Mariachis and the Miracle of Migration

In September, our kids participated in the migration process of the monarch butterfly. As the butterflies made a pit stop in New York City on their annual trek from Canada to Mexico, the children helped to tag the butterflies, while learning about insects and geography. The event’s theme was the “miracle of migration,” since knowledge of how the butterflies make the nearly 3,000-mile journey is still a mystery.

In a workshop led by volunteer Richard Stadin of Mastervision, also a representative of Monarch Watch, the children saw live examples of butterflies in each stage of life. After tagging the butterflies, our budding entomologists were entertained by a traditional mariachi band as everyone sang “Buen Viaje” to the departing butterflies. We’re grateful for the thoughtfulness of the Shevell family. We are also pleased to announce that Jon’s father Myron “Mike” Shevell has also joined the Ronald McDonald House New York Board of Directors! Mr. Shevell is the chairman and CEO of New England Motor Freight, Inc., a multimillion-dollar trucking company based in Elizabeth, NJ.

Welcome to our Board, Mr. Shevell, and thank you for your compassion and leadership.

Built to Last

The hallway leading toward the terrace is lined with circular plaques offering educational tidbits about butterflies and nature. With its alternate function to serve as an educational experience for our young residents, this terrace does not disappoint.

Spaing no detail, the Operations team set out to ensure that the terrace would hold up for many years within our 84-room facility. The first step included the installation of a top of the line Kemper roofing system. Known as the preeminent manufacturer in the waterproofing and roofing industry, Kemper is a leader in the terrace would hold up for many years within our 84-room facility. Wish List

Thank you for your thoughtful donation of items that help to make the transition a little easier for families staying at Ronald McDonald House New York. Following is a list of items that are urgently needed.

FOR THE HOUSE

For further information regarding this Wish List, or to make a donation (NEW items only), please contact Lucirea Ortiz at 212.639.0202 or lucirea@rmh-newyork.org.

FOR THE CHILDREN

• DVDs (movies, G and PG rated)
• Diaper/washcloths (seasonal, all sizes)
• Diapers (the bio “green” type)
• Baby wipes
• Winter Clothing, coats, gloves

FOR THE MOMS AND DADS

• Gift cards
• Visa, MasterCard, American Express, Target, Walgreens, Payless Shoes, JC Penney, Starbucks, Dunkin’ Donuts, Duane Reade, CVS, Borders and Barnes & Noble

FOR THE FAMILIES

• Postage stamps
• Umbrellas
• Main Ponchos

ITEMS FOR THE HOUSE

• Paper goods, disposable cups, plates, napkins
• Plastic goods, disposable forks, knives, spoons
• Toilet paper
• Paper towels
• Linens: Towels, blankets for guest rooms
• Pillows
• Clear plastic containers
• Curel [individually sized]
• Cleaning products
• Green’ laundry detergent
• Clorox or Lysol wipes
• Copy paper
• Photo paper
• Healthy snacks: Granola Bars

A SPECIAL GIFT

• Sponsor a room night payment $15/night
• Sponsor a birthday party or special program party

FOR THE PLAYROOM

For further information regarding Playroom donations, please contact Nelda Barreto, Director of Programs, at 212.639.0205 or nbarreto@rmh-newyork.org.

For the terrace to the lounges, a fresh new wave of breakthrough technology has steadily swept through our hallways. Our hope is that by providing the highest level of comfort and hospitality to our families, they can better focus their energies on fighting cancer.

A long day traveling to New York City or spent in treatment leaves many families longing for a good night’s sleep. Thanks to a new partnership with Ronald McDonald House Charities and Tempur-Pedic® beds, sleep is right there when it’s needed most. Each of the twin beds within our facility have been replaced with 168 new mattresses, box springs, frames and mattress covers. Naturally, a delivery of that size on the Upper East Side of Manhattan is no easy feat. The bedding was delivered during the early morning hours over three consecutive weeks, with our Operations staff and a few key volunteers battling the elements to efficiently distribute and install the bed.

This donation reinforces Ronald McDonald House Charities’ commitment to providing a healthy environment for our families. Our guests were pleasantly surprised and it wasn’t long before compliments poured in to the front desk. For many, the change represented the most luxurious and restful sleep experience that they’d had in a very long time since they had begun their battle with cancer. To keep the momentum going, national partner La-Z-Boy Furniture also contributed two sleeper sofas as part of their annual donation.

The Company Store has ensured that these beds will be nicely dressed thanks to the provision of 904 pieces of bed linens, towels and blankets.

Through a national partnership with Ronald McDonald House Charities, neighborhood appliance superstore BrandSource has provided us with one 40” flat panel television, and three 32” televisions.

And Tel-Serve’s generosity continues to be a blessing to the House. Our daily activities blackboard has been replaced with a donated 32” display that will highlight programming activities more prominently. To accommodate our bilingual families, information will be displayed in both English and Spanish.

Our guest rooms are experiencing a fresh update thanks to Benjamin Moore® donation of 139 gallons of paint, and Biselli is also helping to keep our facility spotless for the holidays thanks to a generous donation of a Versus® Cordless Sweeper, carpet refreshers, and eco-friendly cleaners.

We’re also grateful to Mastro’s Steakhouse for their donation of two often-overlooked items that hold permanent spots on our Wish List: bottled water and paper products such as toilet paper and paper towels.

On behalf of our families, staff and volunteers, we extend many thanks to our sponsors and donors for fulfilling our Wish List requests.

Hospitality at the House

Wisht List

FOR ARTS & CRAFTS:
• Feathers
• Drop cloths for tables
• Oil cloth table cloths
• Crayola modeling clay
• Velcro
• Play-Doh
• Cotton balls
• Glue guns and glue sticks
• LEGO blocks, people and BIONICLE sets
• Plastic foam sheets
• Plastic facing for lanyards
• Pom poms
• Glue dots
• Glitter glue

FOR THE GAME ROOM:
• Foosballs
• Ping pong balls and paddles
• Xbox 360 Games
• PlayStation 3 Games
• Thrones Gift Cards (for our new iPad Programs)

FOR THE TOT SECTION:
• Soft foam building blocks in assorted colors, shapes and sizes
• Play-Doh
• Soft foam building blocks in assorted colors, shapes and sizes
• Assorted LEGO® sets

FOR THE TEENS:
• Wii®
• MTA Metro Cards (for school transportation)
• Baby doll clothing and accessories

FOR ARTS & CRAFTS:
• BIONICLE sets
• Lego®

FOR THE FUTURES:
• Wii®
• LEGO®
• Wii®

Give the Gift of Legends This Holiday Season!

Steiner Sports, the most trusted source of Certified Authentic sports gifts and collectibles in the U.S., has established a gift registry that adds a new dimension of hospitality to the world’s home-away-from-home.

As the Official Collectibles Company of The New York Yankees, Boston Red Sox, Chicago Cubs and Dallas Cowboys, Steiner Sports has released a catalog featuring autographed photographs of prominent sports stars that appeal to all family members.

Steiner Sports is decorateting Ronald McDonald House New York for the holidays (and beyond), and also offering sports fans a unique opportunity to show and share their love for their favorites teams. Many of their remarkable pieces will be available for purchase at special rates, where they will be displayed throughout the facility for families, staff and our many supporters to enjoy.

The Steiner Hook Up

Brandon Steiner and his team recently visited the House and helped redecorate our Playroom with several of his company’s legendary pieces. Mr. Steiner and his team were so moved to help the organization after hearing about a fire that occurred in the lower level area earlier this year.

In addition to a football signed by New York Giants Quarterback Eli Manning, an original signed-bleacher seat from the old Yankee Stadium, and an autographed portrait of Mariano Rivera; our residents can now watch the game on two flat-panel televisions, or play their favorite games like their idols on one of two donated PlayStation 3 consoles.

The Playroom was transformed into a sports-lover’s dream, and two lucky families received tickets to see the Yankees in action. The entire experience was featured on the YES Network show “Memories of the Game” with the episode airing in October.

Not only will your gift bring smiles to young sports fans staying at the House, but you’ll also be making an even bigger difference in all of our families’ lives. For each item sold, a portion of the sale price will be donated to Ronald McDonald House New York.

Pieces are available in either 8”x10” or 16”x20”.
• Bronze level: $ 250
• Silver level: $ 500
• Gold level: $ 750
• Platinum: $1,000
• $2,500

For the past three years, The Guy M. Stewart Cancer Fund, Inc. has been providing Chantilly Lane animated singing bears and animals to each of children staying at Ronald McDonald House New York.

This annual give-away has been made possible by the generosity and kindness of the PBC International Company, located in Oxnard, California.

For more information regarding Steiner Sports, please visit www.steinersports.com/rmhnewyork.

New York Yankees Commemorative Pieces

Steiner Sports' new partnership with Ronald McDonald House is part of the ongoing effort to make the world’s home-away-from-home a little more comfortable for patients and families staying there. As a result, this year, Steiner Sports is donating items to Ronald McDonald House Charities in New York City, which will provide a fresh update for the game room and feature the latest in sports memorabilia.

On behalf of our families, staff and volunteers, we extend many thanks to our sponsors and donors for fulfilling our Wish List requests.

Robert Grubert, Head, US Equity Sales & Trading, RBCCM (New York)

When Robert “Bobby” Grubert of Royal Bank of Canada Capital Markets joined Ronald McDonald House New York’s Board of Directors in 2009, his commitment represented that of the many hearts and minds at his firm. What began as a lone event sponsorship would ultimately blossom into a relationship that would include monthly dinners and a true bond between our families and theirs.

Tell us about how you initially got involved with Ronald McDonald House New York.

A fellow friend and Board Member, Jimmy Jacobson, introduced me to the House. He said, “before you answer let’s go up to the house and take a tour” and get a better sense of what the House is about. Once you get up here and take a tour and see what’s going on with the families and the kids and the staff, it starts right there. It is part of RBC’s culture to give back to the communities that we live and work in. Our culture starts from the top of the house. We could not do this without:

• The commitment from Mark Standish, our president and co-CEO, and Debbie Freer, our U.S. Capital Markets chief operating officer.
• Good Nixon, CEO of RBCC Financial Group, relationship with the House in Toronto.
• Leadership behind Skate with the Greats, where we raised $550,000.

What inspired you to explore other volunteer opportunities after that initial experience?

It is important to see the House. It is infectious—once you come, you become emotionally involved. The connection of when you listen—listen to the families, you listen to a mother talk about what she’s gone through, and she has her child there in her arms. It’s so emotional and so moving, that after two years of that, people asked how can we get more involved? And that’s when it went from a financial commitment to really an emotional connection and willingness of our people at RBC to get more involved. This ultimately led to volunteering at the House.

At RBC, we walk the talk. Our commitment to the House is not only financial; we make a difference with our time, and it fits with our values and our framework of how we do business and how we treat our clients.

• Our relationship goes beyond the firm’s financial commitment.
• The dinners are consistently “over-volunteered” by our employees. We always have more staff than we could use sign up to help.
• We serve approximately 100 people per dinner.

How has volunteering for the House as a group affected RBC employees?

More specifically, what feedback have you received from employees after spending “time at the House”?

It brings people together—it brings our staff together as a team; and it brings families together. I’d say a year ago when we started donating dinner events to the House, the staff at RBC Capital Markets did it because they loved making a difference. And our employees continue to look forward to the monthly visits. Plus, I have heard from families around the House that RBC puts on the best spread. We are very proud of that.

Everyone feels a connection to the families. It could be anything, even a small smile—you really feel like you’re making a difference and you look forward to coming back. These kids are true heroes, and being at the House allows you to see what people are about.

Each person talks about it at the firm, about the personal experience that they’ve had. There are so many emotional ties and connections that it’s difficult to try to articulate the depth of what it does for people and organizations that are involved; you can not fake that.

What does volunteering on behalf of Ronald McDonald House New York mean to you as an individual and a Board Member?

It has increased my awareness about how things change back. There certainly is an appreciation of what the families go through, especially the children. Everyone knows someone who has been afflicted with cancer and that only enhances the feeling of giving back. That’s the first thing. The connection is undeniable; the staff—it’s sincere, it’s authentic. People come here to volunteer or get involved and immediately feel the power of the House. Having the opportunity to work with people who are in the House from around the world, telling them about New York, gives me pride and a greater appreciation for the community that I live and work in.

As a Board Member, I’m always thinking of ways to introduce others to the experience [of helping out at Ronald McDonald House New York] Whether it’s helping out as a group, sponsoring an event, or fulfilling Wish List requests for the holidays, people are finding ways to contribute in their own unique way.

On a more personal level, we walked in one night and there was a woman there from Canada who worked for a Canadian company and, our being a Canadian bank, it resonated at that moment. The woman then introduced me to her son, Aiden, and being the new dad of boy named Aiden, it resonated even more.

I walk away from a night at the House feeling as though my day-to-day life’s struggles are not really that significant compared to the struggles of these families fighting pediatric cancer.

“Once we figure out how long a family is staying, we try to enroll the sibling into public or private school. Our public schools will take children from Ronald McDonald House New York within 24 hours,” said Mrs. Barreto. “If a patient needs school, the parent usually arranges home schooling through the social worker, who makes arrangements through the New York City Department of Education. Then the instruction happens here at the House.”

“Teachers make scheduled trips to the House on a daily basis, and students also receive additional support from the five tutors who visit the House daily from 4 p.m. to 7 p.m.”

“It helps them with their confidence,” said Sandy Newell, a 24-year veteran of the New York City Board of Education homeschooling program. “If a child is sick, it’s a knock to their confidence. They can still learn, and they can do it. In trying to teach something new, when you see that they’re learning and they know it, it gives the children confidence and it makes them feel happy.”

When discussing the education program at the House, Ms. Newell said, “I’ve been teaching in homes and I’ve been teaching in hospitals. But nothing is like coming here. You walk in the door and the staff is always supportive. Everyone goes out of their way to assist you. The facilities are top-rate with a computer...” (continued)
Drama with Christine,” kids (and parents, her programs, “Weird Science” and a twice-weekly basis at Ronald McDonald House New York since 2006, and their daughter Chloe — who did not speak English. Of the able to accommodate those who didn’t speak English. They sent the family to Woodhull Medical Center in Brooklyn in April 2009. The doctors had no answers. After returning from Trinidad, Fitzgerald suddenly ran an alarmingly high fever, and his family began to consider other options. "What is Acute Lymphocytic Leukemia?" Acute lymphocytic leukemia (ALL) is a type of blood cancer that begins with the formation of a single cell in the bone marrow. Also known as “acute lymphoblastic” or “acute lymphoid” leukemia, symptoms include aching in the arms, legs and back, enlarged lymph nodes, black-and-blue marks with no apparent cause, and unexplained fever. Screening for the illness are conducted through specific blood and bone marrow tests that can identify abnormal cells known as leukemic “blast” cells.

Feature

John Fitzgerald Clarkson, Jr.: Celebrating New Life

As with many programs available to our families, the genesis usually stems from a unique necessity. With families coming from more than 70 countries worldwide to stay at Ronald McDonald House New York, a major concern was being able to accommodate those who did not speak English. Of the five tutors who come to the House every day, two of them specialize in English as a Second Language (ESL). Participants include patients, caregivers, and sometimes Ronald McDonald House staff and volunteers.

Practical Magic in the Playroom

For more than three years, Christine Taylor has been volunteering on a twice-weekly basis at Ronald McDonald House New York. With her programs, “Weird Science” and “Drama with Christine,” kids (and parents, too) become captivated by unique science experiments and theatrical presentations — starring themselves as the main characters.

“We do CSI where they learn blood type and fingerprinting. Instead of just doing it, I give them a whole story,” said Mrs. Taylor. “Because I remember as a kid anything that was out of the ordinary or unexpected, or had a story line to it. I try to give everything we do some depth and some interest and something more than what you see everywhere else.”

Mrs. Taylor’s work provides a therapeutic release for children where their young minds embrace new discoveries; forgetting the stress of battling cancer.

“Children will come in and they’ll be crying in their mother’s arms and they’ll be in pain,” said Mrs. Taylor. “Their mom will ask them if they want to make an earth quake, and the next thing I know, the same child that was crying is squealing with delight. It’s also the beauty of children. I think all of that takes them to another planet. Away from the cancer planet.”

And so an idea was born. Several gifted students are helping to direct, produce and star in the upcoming production, “Planet Wannabe.” In the movie, a team of astronauts encounter alien creatures who introduce them to a far-away planet where young people can be whatever they “wannabe.” Get it?

But for all the fun that is had here at Ronald McDonald House New York, there is no doubt that healing is indeed taking place. “I think love and joy and entertainment and music — all those things. I think everything that the House offers, all those little extras, from the dinners, to the entertainment, to what I do — I think it’s all a part of the healing process. Anytime you can get their minds into something positive, something exciting. That’s gotta help the healing.”

To find out how you can get involved and support our educational programs, contact Nelida Barreto at 212-639-0205, or via email at nbarreto@rmh-newyork.org.

John Fitzgerald Clarkson, Jr. is a 11-year-old who battles acute lymphocytic leukemia (ALL) and is living in New York City. His family moved to New York from Grenada in Trinidad & Tobago because of his illness. Despite all of the energy that you see today, it’s hard to believe that a little under two years ago, this remarkable young man with extraordinary spirit had arrived from Grenada unable to walk and in severe pain, battling acute lymphocytic leukemia (ALL). "Fitzgerald was on holiday in England and his aunt called and said he just stopped eating," said his father John Fitzgerald Clarkson, Sr. “When he came back to Grenada, we saw that he’d lost weight. He said his hand was hurting him, and his back was hurting him. Then he went to school and he said, ‘Daddy, I can not walk.’ After preliminary tests in Grenada proved inconclusive, the family sought answers nearby in Barbados and Trinidad & Tobago. The doctors had no answers. After returning from Trinidad, Fitzgerald suddenly ran an alarmingly high fever, and his family began to consider other options. With the help of a cousin living in New York City, his father and grandmother Luret brought him to Woodhull Medical Center in Brooklyn in April 2009. The doctors at Woodhull had suspicions of a diagnosis, but they sent the family to New York University Medical Center for confirmation where they learned that Fitzgerald had acute lymphocytic leukemia.

Sara Jaye Weiss

Fall 2010

Around the House Magazine

www.rmh-newyork.org
According to the Leukemia and Lymphoma Society, most children who are diagnosed with ALL are cured of their disease after treatment. Options include chemotherapy, radiation, bone marrow transplants and stem cell transplants.

**Easing the Financial Burden**

By the end of their first month in New York City, the Clarksons had depleted their financial resources and they were exhausted from shuttling back and forth between the Manhattan and Brooklyn medical centers without a stable residence. In addition to their lodgings woes, their next major challenge became finding and affording food that they were accustomed to.

Living on a farm in what is known as “The Spice Isle” of the Caribbean, the family’s diet consisted mostly of fresh chicken, fish and pork, and root vegetables (known on some islands as ground provisions) such as white yams, and dasheen (taro). John used to get it from there. At that time, I didn’t even know where 14 Street was. Now we go to Brooklyn, on Utica and Church.

Samuel Agyare, M.D., a pediatrician affiliated with Woodhull Medical Center, was sympathetic toward the family’s situation and offered many words of comfort to the family. He recommended that they seek help at Ronald McDonald House New York. With the help of their social worker at NYU, the Clarksons secured housing at Ronald McDonald House New York, and they checked in at the end of April 2009. With a stable place to call home, they were able to focus on fighting Fitzgerald’s cancer.

**Treating Leukemia**

The fact that Fitzgerald’s hometown was more than 2,000 miles away where pediatric cancer care options were limited in Grenada played a major part in determining his course of treatment. When doctors conducted Fitzgerald’s first bone marrow aspiration test, they removed a semi-liquid form of his bone marrow. The results revealed that his body had already begun to heal. A second aspiration test revealed that Fitzgerald’s cancer had gone into remission.

Doctors advised that Fitzgerald’s best chance for total recovery would be a bone marrow transplant. They would remove what remained of the cells in his bones, and replace it with new marrow that would be able to produce a healthy supply of red and white blood cells, and platelets.

“We went to Columbia, the August of that year,” recalled Mr. Clarkson. “They did a PET; they did an MRI, they did everything to check him out and it was said to me, he was in what you called a solid remission. ‘That was just before the transplant.”

Fitzgerald received his bone marrow transplant from an unrelated (non-relative) donor at New York-Presbyterian Hospital in August 2009. The procedure was successful.

“Eventually these new cells find their way into the bone marrow, and it’s called engrafting,” explained Chaplain Cherilyn Frei, director of Family Support at Ronald McDonald House New York. “They start to colonize inside your bone marrow, and they create new bone marrow. Eventually, that starts to make new white and red cells, and it takes about 100 days. During that time, you’re very susceptible to infection because you have no immune system. That’s where the antibiotics and antifungicides come into play, because your body can’t fight off bacteria, fungus, or anything that we normally do.”

The facilities at Ronald McDonald House New York provided the ideal environment for recovery while Fitzgerald was in isolation. With more than 30 years of experience caring for families fighting pediatric cancer, the staff was well-prepared to accommodate the Clarksons’ needs.

“During that 100 days, you’re typically isolated in a room and the patient has a mask on, or gloves on. The patient has no physical one-on-one human contact,” continued Chaplain Frei.

“If the engrafting is successful, that person will have a whole new immune system. If you were All-blood, you might be A-positive, later, or you might be O. You totally take on the immune system of this donor, which is a miracle itself. And that’s what’s happened with Fitzgerald, he’s taken on this immune system, which has totally eradicated all of the cancer cells—all the blast cells that were in his bone marrow that were causing the leukemia. So he’s well and he’s cured.”

**Complications**

A common complication associated with bone marrow transplant procedures is a condition called graft-versus-host disease. With the condition, infection-fighting cells in the transplanted marrow began to consider Fitzgerald’s own tissue as foreign, and they began to attack.

Fitzgerald has lost pigmentation in his skin and hair, however over time, it’s going away as his body continues to heal.

“Graft-versus-host disease can affect any organ within a person’s body. Where you see it on Fitzgerald, it’s manifesting on his skin. The skin is an organ, too,” explained Chaplain Frei. “So when a person gets the graft-versus-host disease, it shows up on their skin, it causes these patches. On a Caucasian person, it might be a red patch. But on a person of color, it might be purple the pigment. So what you see with Fitzgerald, [the pigment] will come back. And as you can see with time, it is coming back. Probably in a year or two, you might not see any remnants of this on his body at all.”

**Life at the House**

Since his arrival, Fitzgerald’s presence has been felt by just about everyone including the other families, staff and volunteers.

He’s a founding member of our Press Crew, a team of young journalists who report on life at the House from the young resident’s perspective. In the Playroom and in our hallways, his dimpled smile always includes an unmistakable hint of curiosity and a sometimes a twinge of mischief.

While his presence has had an impact on the House, his father believes that the House has had an even bigger impact on the entire family.

“Some people say that [we] need to get Fitzgerald back into a routine,” said Mr. Clarkson. “The routine we need to get Fitzgerald back into right now is just to live. Eat, sleep, play with people, interacting and living with people.”

“Everybody knows him,” added Mr. Clarkson. “I am very happy with Ronald McDonald House, with the Playroom, the Computer Room, everything, because he is having a blast. As Fitzgerald’s parent, I was very happy to be here. This is something that will leave an indelible impression on me, Ronald McDonald House New York. It is excellent to be here.”

In a few short months, the Clarkson family will be heading home, first visiting with relatives in the United Kingdom (where their battle began), before going back to Grenada. But the reunion will also be full of new beginnings. In June 2009, just two months shy of his transplant operation, they received news from Grenada that Fitzgerald’s mother had given birth to a baby sister back home named Diamond.

The family is hoping that Fitzgerald’s experience will raise awareness of childhood cancers within the Caribbean, and ultimately attract the necessary resources to help families dealing with similar circumstances. Until that time, there will always be a home for families like the Clarksons at Ronald McDonald House New York.
Children’s Happy Faces Foundation’s Day of Fun Raises More than $360,000

The words “bright and sunny” couldn’t have described the day better as Children’s Happy Faces Foundation took to the greens to help families in crisis on September 21st. Held at Sleepy Hollow Country Club, with additional foursomes tee ing off at Trump National Golf Club, the event raised more than $650,000 on behalf of Ronald McDonald House® New York. A special “Wish-Hole” raised additional funds for the Make-A-Wish Foundation® of the Hudson Valley.

“Thanks to the extraordinary support that we have received leading up to this event, Children’s Happy Faces Foundation has raised more than $1 million since our inception four years ago,” said David Lipson, managing director of the event’s Title Sponsor Century Management Services, and event chair. “When you see the happy faces on these kids, it all makes sense. Without the generous support of such compassionate hearts and minds, we could not have accomplished this tremendous feat.”

With 12 foursomes participating at Sleepy Hollow Country Club Championship Golf Course, and 25 foursomes at Trump National, the day’s activities included horseback riding, tennis, and dominos. When the sun went down, with a live auction courtesy of Sotheby’s, winning was the word with luxury prizes such as a king-sized DUX bed, Randolph Rose bronze sculpture, tickets to “The Late Show with David Letterman,” and custom-clothing by Dionisio Vasco. The Parker Reilly Band provided the entertainment as the evening was rounded out with Casino Night tables, a silent auction and also a Chinese auction.

In addition to Century Management Services, the fundraiser was also supported by a number of notable organizations that included Platinum Sponsor NCB, and Gold Sponsors Efficient Combustion & Cooling Corporation, Hercules Corporation and Mustang Harry’s. Morgan Stanley, Hess Corporation, Skanska USA Building, Inc., and the New York Association of Realty Managers also contributed to the day’s success.

Dr. Aaron Rausen

He had a heart for service and a wisdom that was unparalleled. When Aaron Rausen, M.D. joined Ronald McDonald House New York’s Board of Directors 17 years ago, he brought with him an extraordinary type of leadership that was felt by many.

A pioneer in the field of pediatric oncology, Dr. Rausen held a dedicated and generous spirit - the same spirit in which the Ronald McDonald House does its amazing work. Our family is grateful that Dr. Rausen’s legacy of uncompromising patient care is being honored and will continue to inspire others at the Ronald McDonald House.

Dr. Rausen passed away on July 7th following an admirable battle with prostate cancer. On behalf of the staff, volunteers and families and the Ronald McDonald House New York Board of Directors, we are forever grateful to Dr. Rausen and his family for his contribution in the fight against pediatric cancer.

Barbara Nicoll

Earlier this year, Ronald McDonald House New York said farewell to our dear friend Barbara Nicoll. Along with 2008 Hope Awardee Phyllis Hahn, Barbara volunteered as a member of the “Women’s Auxiliary Congregation Emanu-El,” affiliated with Temple Emanu-El.

Having served at the House for 12 years, Barbara brought a great deal of cheer and love to our children. Here are Mrs. Hahn’s thoughts in remembrance:

Barbara had such love for the children and the House, and everything that it represented. When it was holiday time, we would do a Hanukkah party, we would do a Passover party, and Barbara sang. She was an actress, so that was a highlight. She launched (volunteering at Ronald McDonald House New York) with all of us and it flourished. It was very, of course, very near and dear to her, and she was an integral part of the program.
Fall Back to School Event

Seven weeks of Camp Ronald McDonald can be a tough act to follow; especially when camp includes a movie shoot, trapeze school outings and trips to the White House. So how did the Programs department help our families with their transition into the fall back-to-school season?

On Friday, September 24, families at Ronald McDonald House New York were treated to a “Fall Back to School” event. More than 80 children received donated school items including backpacks, notebooks, binders, and other supplies in fulfillment of lists provided by local schools. With most of the items donated by BDO Valuation Advisors, LLC, the backpacks also featured an infusion of fun thanks to comic books donated courtesy of Goldwater of Archie Comics Publications.

Archie and the Gang Visit the Upper East Side

Take a visit to our newly renovated Playroom and you’re sure to notice some new, but familiar faces. Thanks to a generous donation from the talented team at Archie Comics Publications the entire gang can now call Ronald McDonald House New York its home-away-from-Riverdale. Via a seven-foot-tall mural, children staying at Ronald McDonald House New York now have a fun new backdrop for Programming and literacy.

The Tree of Life

Visitors to Ronald McDonald House® New York have noticed that The Tree of Life wall sculpture continues to flourish with new leaf additions; especially with our most recent additions including a leaf placed for our beloved Founder Vivian Harris.

More and more families are honoring loved ones with the installation of leaves. This vibrant symbol of life and strength provides each family with an extraordinary way to memorialize and celebrate the life of someone special.

The financial support generated for Ronald McDonald House New York from The Tree of Life enables us to offer more than just a place to sleep when families travel to New York City for their child’s cancer treatment. Like a tree, the House provides shelter, has many branches of support and gives us strength in times of turmoil. The House is a home-away-from-home, a place with an extended family and life-long friendships with those who are there when you need them.

Leaves are engraved with a message and the name of the honored person. Each leaf may be purchased for $2,500. Your leaf will be placed on The Tree of Life and you will receive a beautiful glass tile in your loved one’s name. Your generosity is greatly appreciated and will help us continue to offer services to families arriving today, tomorrow and in the years ahead.

For more information or to purchase a leaf, please contact Director of Development Richard Martin, at (212) 639-0100.

Tributes & Memorials

Perhaps you may have thought of a donation to Ronald McDonald House New York as a means to mark a joyous occasion, to memorialize a family member or friend, or to celebrate the strength and resilience of someone whose spirit embodies the hope that lives within our House. To make a tribute or memorial donation, please call 212.639.0100.

Double the Impact of Your Gift!

Double the impact of your gift!
LIGHT A LIGHT, SHARE A NIGHT
Give the gift of shelter, hope and love this holiday season!

For more than 30 years, families staying at Ronald McDonald House New York have benefited from the generosity of kind, compassionate supporters who recognize the financial burden caused by cancer. Families staying at the House are asked to pay a nominal fee of $35/night, however no family is turned away for its inability to pay. Through our Share a Night program, millions of New Yorkers have helped to bridge the gap by providing much-needed funds that help us to provide more than just simply shelter, but a true home-away-from-home for families from more than 70 countries worldwide. We hope you will join us as we celebrate our Share a Night program.

For more information on how you can help support a family’s stay at Ronald McDonald House New York, visit www.rmh-newyork.org, or call (212) 639-0600.

Date: Thursday, December 2, 2010
Time: 5:00 PM
Location: East 73rd Street (Between First and York Avenues)

SKATE WITH THE GREATS IN 2011!
Join us for our 17th Annual “Skate with the Greats” event as the New York Rangers kick off their 85th Anniversary at the Rink at Rockefeller Center alongside our families and dedicated supporters.
